In Re: PS Docket No. 12-94  
*Ex Parte* discussion

Dear Ms. Dortch:

On June 12<sup>th</sup>, 2012, Greg Brown, the Chairman and Chief Executive Officer of Motorola Solutions, Inc. ("MSI"), had a brief teleconference with Chairman Julius Genachowski to discuss the implementation of the Middle Class Tax Relief and Job Creation Act of 2012 ("Spectrum Act").

During this discussion, Mr. Brown reiterated MSI's position, as detailed in recent comments filed in PS Docket No. 12-94.<sup>1</sup> that the Spectrum Act does not disturb the FCC's broad authority over spectrum, including the 700 MHz Public Safety Broadband and D Block spectrum. He argued that the Congressional mandate is sufficiently broad to enable the Commission to maintain its existing waiver policies that support early deployment of public safety broadband networks.

Mr. Brown also emphasized his belief that it is clearly in the public interest for the FCC to allow the waivers to move forward while FirstNet becomes fully operational and is able to fulfill its role to oversee the development and construction the nationwide communications system for public safety. He stressed that doing so would result in the accrual of significant benefits to the affected public safety users in the near term.

Fax: +1 202 842 3578

Lastly, Mr. Brown explained MSI's view that the early deployment networks will be interoperable with the FirstNet nationwide system, given their reliance and utilization of technology consistent with commercial standards developed by 3GPP.

This notification is submitted in accordance with Section 1.1206 of the Commission's rules, 47 C.F.R. § 1.1206. Please let me know if there are any questions about this submission.

Respectfully submitted,

[REDACTED]

Catherine Seidel  
Chief,  
Global Spectrum and Regulatory Policy
